

Premium Quality
**IQF Vegetables and
Frozen Purees**

An Oregon Potato Family Company

From farm, to frozen, to families

Goodness from the heart of Western Michigan's vegetable country!

Michigan leads the nation in the production of specialty crops, making it the second most agriculturally diverse state in the United States. This gives Michigan-based OPC Arbre Farms the ability to offer many types of vegetables. We are committed to bringing the best Michigan has to offer, from high quality products and great service to food safety through continual improvement and building lasting relationships with our grower partners and customers.
